

P-80®

TEMPORARY RUBBER LUBRICANTS

The safe, easy, inexpensive way to improve production and assembly operations involving rubber and rubber parts!

CinchSeal® recommends P-80® for seal installation!

What are P-80®

Temporary Rubber Lubricants?

P-80 Lubricants are unique assembly aids. They are specifically formulated to provide temporary lubrication that makes rubber easy to install, remove, or otherwise manipulate. **P-80's** temporary nature is a result of its chemical composition. The lubricants provide a high degree of lubricity when wet, but because they do not contain any silicones or other persistent ingredients, once dry the slipping action goes away. **P-80** products are also free of petroleum distillates, so they will not dry, crack or otherwise harm rubber parts. **P-80** is compatible with most metals, plastics, and natural and synthetic elastomers. *Also available in incidental food contact formulas!*

P-80® THIX and P-80® Emulsion are biodegradable.

Water-Based • Non-Toxic • Non-Flammable • Easy Use and Disposal

P-80® products have been proven effective for a wide range of assembly operations involving:

- Boots
- Bumpers
- Bushings
- Diaphragms
- Grommets
- Hoses
- Insulators
- Mounts
- O-rings
- Plugs
- Rubber moldings
- Seals
- Sleeves
- Tires
- Rubber washers
- Wire harnesses

...And hundreds of other rubber and soft plastic parts.

P-80® now available in re-sealable 10ml tubes!
